Bridge course for session 2023-24

Duration :01/07/2023 to 07/07/2023

Objective of course :

The objective of the bridge course is to demystify what is expected of students in Pre University-level classes and to provide adequate foundation in the core applied science subjects, limited to moderate level so that students do not face any difficulty when the classes commence. Working on the requirements of the students after identifying the problems. Bridging the gap between slow learners and the usual learners. Prepare the slow learners to take up the commencing degree classes properly. Monitor and enhance performance towards excellence.

The Context:

Separate sessions are organized to slow learners by the subject specialists. Slow Learners have difficulty in keeping up with the classroom as their IQ is low. In all likelihood, these students do not have a learning disability and hence are mostly overlooked. Many of such students tend to drop out of college because the classroom is hard for them. If proper guidance is given to students then it is beneficial for future of students. Learning is a lifelong Endeavour and each student should be given an opportunity for a consistent growth in his or her life. Hence department of Electronics is having motto by providing a separate platform for all such learners, who due to certain unavoidable circumstances could not come into the main force.

Eligibility : H.Sc. Passed students enrolled for B.Sc. Part I

This innovative Best Practice was implemented on the occasion of **National Science Day 2021**. It was inaugurated at the hands of Hon'ble Principal Dr. J. D. Wadate on 27th February 2021 at 12.00 noon.

Followings are the some interesting features about this Best Practice.

- This quiz is aimed to trigger the logical thinking capabilities of the students.
- The quiz is solely sponsored by the Volunteer Teachers of the department.
- Each Faculty from this department will write a physics quiz which would be of very fundamental kind of nature and student has to dig his brain to solve the quiz thereby understanding the concepts of physics.
- Any B.Sc. student can solve the quiz on the board itself and write his /her name after solving it. If answer is correct, the student will get the prize with the hands of Quiz Sponsoring Teacher.

For the session 2023-24, Three quizzes were put on the Physics Quiz Board. The details of the quiz and students Participation are as follows.

Guest lecture

Mahatma Fule Arts, Commerce & Sitaramji Chaudhari Sci. Mahavidyalaya Warud, Dist. Amravati
Department of Computer Science
Session 2023-24
Report of Guestlecture

Students of U.G. Department has been organized Guest Lecture On dated 16/09/2023.

Dr. D.P. Kale Ex. Head of (Siddhi Vinayak technical institute Khargam) and presenting working at LMS. College Warud was delivered a lecture on Topic "Robotics and Artificial Intelligence."

Robotics is a branch of engineering and computer science that involves the conception, design, manufacture and operation of robots. The objective of the robotics field is to create intelligent machines that can assist humans in a variety of ways.

Robotics involve the creation of robots to perform tasks without further intervention, while AI is how systems emulate the human mind to make decisions and learn.

Robotics is a branch of technology that deals with physical robots. Robots are programmable machines that are usually able to carry out a series of actions autonomously, or semi-autonomously. In my opinion, there are three important factors which constitute a robot: 1) Robots interact with the physical world via sensors and actuators. 2) Robots are programmable. 3) Robots are usually autonomous or semi-autonomous.

Artificial intelligence (AI) is a branch of computer science. It involves developing computer programs to complete tasks that would otherwise require human intelligence. [AI algorithms can tackle](#) learning, perception, problem-solving, language-understanding and/or logical reasoning. Then Vote of Thank of Ms. Prachi Nishat and declare that the guest Lecture has be over.

Department Of Home Economics**

Report

Breastfeeding Day

Home Economics department celebrated Breastfeeding day on 1st of August, 2023. Chief speaker renowned Dr. Samata Chaudhari guided the benefits and importance of breastfeeding to the students. Breastfeeding is considered to be a natural and a secured food. It helps to build immunity in an infant and protect it from other diseases. Mother's milk contains enough nutritious constituents. Therefore to keep it nutritious for a longer time, she needs to take a nutritious diet. Further, Dr. Samata Chaudhari also stated that breastfeeding helps to prevent the breast cancer.

From medical point of view, breastfeeding is considered as the best meal. Nature has created milk for the humans and while taking and serving it, infant and mother both feel satisfactory.

This program has been successful with all the efforts and dedication by Head of the Home Economics department senior college, Prof. Dr. Mrs. N.A. Bodkhe, Home science department Head Ku. V.S. Kharode, and Pawar Madam. 93 Students attended this program.
